

AMFEX HOUSING CENSUS

Objective:

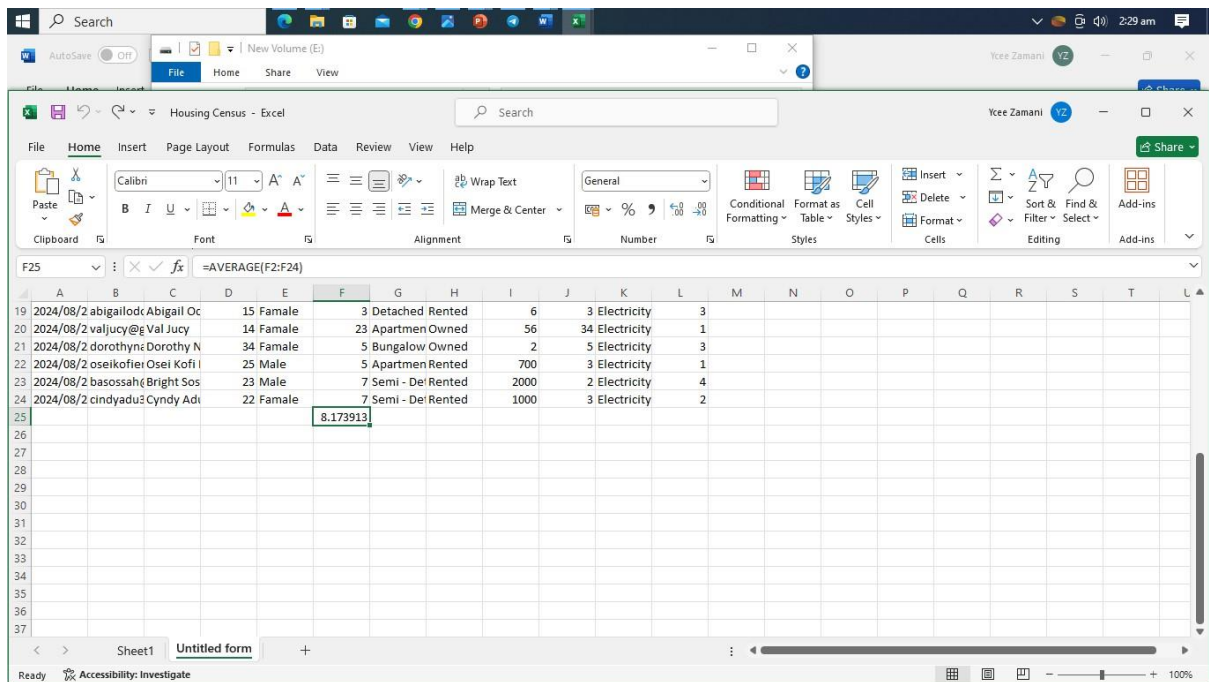

To summarize the findings from the data analysis focusing on average household size and the distribution of ownership status.

Average Household Size

Findings:

The average household size has been calculated from the dataset provided. The analysis indicates the mean number of people per household.

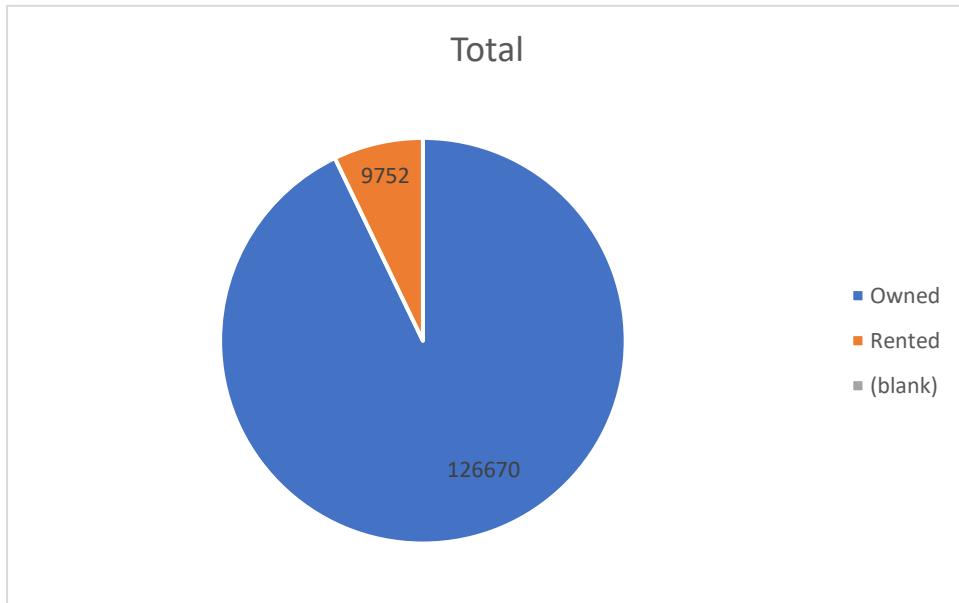

(Average = F2:F24)

Ownership vrs Rent status

The ownership status was categorized into three groups: Ownership and monthly rent/mortgaged. The analysis reveals the percentage distribution of each status across the dataset.

Conclusion

The data analysis provides a clear picture of household sizes and ownership status. The average household size suggests a predominance of smaller to medium-sized households, while the ownership status distribution highlights a greater tendency towards property ownership compared to renting.
